TROPOS METROMESH™ PARTNER PROGRAM ADDS VIDEO SURVEILLANCE INDUSTRY LEADERS

Companies enable creation of best-of-breed wireless video surveillance solutions to economically enhance public safety

SUNNYVALE, CA, November 14, 2005 – Tropos Networks, the proven leader in delivering ubiquitous, metro-scale, Wi-Fi mesh network systems, today announced that four video surveillance market leaders have joined the Tropos MetroMesh Partner Program. Products from these new Tropos MetroMesh Solution Partners have demonstrated interoperability with Tropos MetroMesh networks, enabling metro-scale wireless video surveillance solutions for public safety agencies. Wireless video surveillance installations have a proven track record of improving public safety.

The new Tropos MetroMesh Solution Program participants focused on video surveillance are:

- Data911, a leading developer of powerful mobile computers with sunlight-visible touchscreen displays, mobile digital video systems and mobile-centric public safety software.
- On-Net Surveillance Systems, Inc. (OnSSI), a market leader in developing open architecture, IP-based video surveillance solutions. OnSSI delivers feature-rich recording, video portability and distribution solutions, automated by the use of Push Live Video technology. Wireless users, including law enforcement and emergency personnel, can remotely monitor and control surveillance systems, improving response time and efficiency.
- Panasonic, a worldwide, leading manufacturer of rugged mobile laptop computers and a recognized industry leader in the field of digital video technology and mobile video solutions.
- Sony Electronics, who will offer a wide selection of MPEG and JPEG compression-based IP security video cameras from their IPELA® line for integration into Tropos' metro-scale Wi-Fi mesh network systems, offering remote surveillance and comprehensive, turn-key solutions for end users.

-more-

“In a post-9/11 world, the first-responder force-multiplying effect of video surveillance has become invaluable,” said Ron Sege, president and CEO of Tropos Networks. “Tropos and our video surveillance partners are today improving public safety with fast, low cost, simple and comprehensive wireless video surveillance solutions for our common customers worldwide.”

Separately, Tropos Networks announced a number of Tropos MetroMesh Development and Solution Partners focused on functionality such as OSS/BSS systems, secure IP mobility, automated meter reading and point-to-multi-point wireless backhaul. Tropos anticipates announcing more Tropos MetroMesh Development and Solution Partners in the near future.

About Tropos Networks, Inc.

Tropos Networks is the proven leader in delivering ubiquitous, metro-scale Wi-Fi mesh network systems. Our mission is to enable wireless broadband access everywhere for everyone through innovative, low-cost and simple products, software tools and services. We have deployed larger and longer-operating systems in more municipalities than any other company in our industry. Our unique expertise includes high-performance mesh software development, mesh RF engineering, metro-scale network planning, deployment and optimization, and navigating the municipal approval process. Tropos Networks is headquartered in Sunnyvale, California. For more information, please visit www.tropos.com, call 408-331-6800 or write to info@tropos.com.
